

Good afternoon,

This past week several snow machines appeared on the Right of Way where Valard is stringing conductor. I don't know if they were from any of your communities but we would appreciate it if you could remind your folks that snowmobiling on the ROW in an active construction zone can be very dangerous. We know people from your communities trap and travel in the area and crossing the ROW when it is safe to do so is fine. If you have networks where you can ask people not to travel in the active construction zones we would be grateful. We don't want to see anyone get hurt or damage their machines.

As always, if you have questions or concerns about this, or any other issue related to the line construction, please let me know.

Thank you for your attention to this.
